

**TRANSFORMING ENERGY,
DELIVERING EXCELLENCE!**

Utility Transformers *Brochure*

About US

Enershark is a dedicated supplier of oil-filled and dry-type transformers, delivering high-performance, reliable solutions for utility, industrial, and commercial applications.

Through our close collaboration with leading transformer manufacturers in Asia and North America, we provide consistent product quality, fast lead times, and competitive pricing. This enables our clients—including utilities, EPC firms, renewable energy developers, and data center operators—to keep their projects on schedule and within budget.

Instead of relying on a single manufacturer or offering a wide range of unrelated products, Enershark operates as a focused sourcing partner specializing exclusively in transformers. This specialization gives us the flexibility to meet diverse technical requirements, tight delivery timelines, and budget constraints—helping our clients simplify procurement and accelerate project execution.

Our mission is to simplify transformer sourcing through trusted partnerships, technical expertise, and a relentless focus on customer success.

Fast Lead Times:

- **Padmount Transformers: Made to Order in as fast as 10 weeks**
- **Substation Transformers: Made to Order in as fast as 26 weeks**

Single Phase Pole-mount Transformers, voltage up to 7.2 KV, power rating up to 50KVA or customized design.

Single Phase Pad-mount Transformers, voltage up 34.5 KV, power rating up to 250KVA or customized design.

Three Phase Padmount Transformers, voltage up to 34.5 KV, power rating up to 3750 KVA or customized design,

Power Transformers 66-110KV, 30-270MVA

Power Transformers 220KV, Capacity as per Requirements

Power Transformers 330KV, Capacity as per Requirements

Power Transformers 400kv and Above, Capacity as per Requirements

ENERSHARK

Manufacturing Facilities

Finished Pole-Mount Transformer

Copper wire for winding

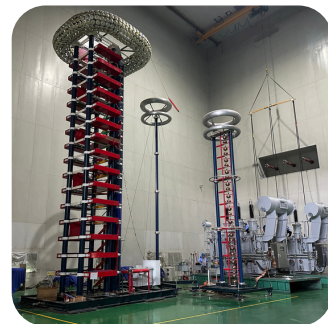

Silicon steel Material

High-Voltage Bushings

Power Transformer Production Line

High-Voltage Testing Tower
